

# AI Flashcard Generator (Swift POC)

Transform notes → study cards in minutes

- Input: text or photo
- Output: flashcards

## What It Does (POC)

- Scan or paste notes → extract text with Vision
- Send text to LLM → generate Q/A
- Review, edit, and approve
- Practice with simple spaced repetition

# User Flow

1. Home → Create Deck
2. Add Source → Scan or paste text
3. Preview text → quick cleanup
4. Generate cards → review list
5. Edit/approve → save deck
6. Practice → self-grade

# MVP Scope

- Capture: camera scan (VisionKit)
- OCR: Vision text recognition
- Generation: call LLM API
- Card editor: edit/approve/delete
- Study mode: Leitner system?
- Storage: Core Data or SQLite
- Sharing & collaboration
